

OPTIMISE YOUR AWS ENVIRONMENT IN LINE WITH AWS BEST PRACTICES. BE WELL ARCHITECTED!

Cloud Architecture
Review (CAR)

Adobe Stock

A man in a light blue sweater and glasses is standing in a server room, looking at a laptop. The room is dimly lit with blue light from the server racks. The background shows rows of server racks and a large 'Adobe Stock' watermark.

Cloud first, means architected first

Being on the cloud is not enough. It is critical to have the right understanding of state of the workload and get an insightful understanding of your cloud architecture and the related best practices. Your business should always have the optimal mix of infra, solutions and spends. Only then will you be able to take home the dividends of the cloud computing promise - of agility, scalability, responsiveness and business impact. Simply put, it is vital for businesses to align their workloads - measure and improve the steps and techniques, based on the business and technical objectives. To get a handle on all of this, you need a well architected and optimised cloud environment. Find out how with Minfy.

WHAT IS THE CAR FRAMEWORK?

The AWS guided Cloud Architecture Framework describes the key concepts, design principles, and architectural best practices for designing and running workloads in the cloud. By answering a set of foundational questions, you learn how well your architecture aligns with cloud best practices and are provided guidance for making improvements.

Pillars Principles

Design

Questions

Why the CAR framework?

The framework is an action oriented one which helps businesses build and deploy infrastructure faster on the cloud. While doing so it helps in lowering and mitigating risks. The Framework delivers insights that enable informed decisions and as the cycle progresses teams end up learning and making AWS best practices as part of their customer driven culture.

How does CAR work

150+

Successful cloud optimization done globally

8 Hours

Time taken to get a comprehensive CAR done by Minfy

90%

CAR Customers leveraged AWS advanced services to improve their workloads

40%

Cost Savings by adapting the Minfy recommended Well-Architected Framework

Five Pillars

Operational Excellence Pillar

The operational excellence pillar focuses on running and monitoring systems to deliver business value, and continually improving processes and procedures. Key topics include automating changes, responding to events, and defining standards to manage daily operations.

Security Pillar

The security pillar focuses on protecting information and systems. Key topics include confidentiality and integrity of data, identifying and managing who can do what with privilege management, protecting systems, and establishing controls to detect security events.

Reliability Pillar

The reliability pillar focuses on ensuring a workload performs its intended function correctly and consistently when it's expected to. A resilient workload quickly recovers from failures to meet business and customer demand. Key topics include distributed system design, recovery planning, and how to handle change.

Performance Efficiency Pillar

The performance efficiency pillar focuses on using IT and computing resources efficiently. Key topics include selecting the right resource types and sizes based on workload requirements, monitoring performance, and making informed decisions to maintain efficiency as business needs evolve.

Cost Optimization Pillar

The cost optimization pillar focuses on avoiding unnecessary costs. Key topics include understanding and controlling where money is being spent, selecting the most appropriate and right number of resource types, analyzing spend over time, and scaling to meet business needs without overspending.

Who benefits from CAR

Security

Lurking security issues get identified and remedial action suggested

Operations

Guidance on reducing the overhead in managing systems

Product management

How to make application available on a continuing and purposive basis

Finance

Ideal pay-out benchmarking and insights

Customer support

Insights and advisory framework on improving response time to end customer impacting incidents

Our CAR Customers

Tailor-made plans

SILVER

Based on the customer priority any of the two pillars will be selected for the review, it will be a one day activity - 8 hours of remediation support will be provided.

GOLD

For Architectures with monthly spend of \$1-5,000. A2-Day of Architecture deep dive & REview and 8 days of remediation delivered by a Minfy expert remotely

PLATINUM

For Architectures with monthly spend of \$5,000 -20,000. A3 - Day of Architecture deep dive & Review and 20 days of remediation delivered by a Minfy expert in a both on-site and remote setup.

“Pillars are not merely symbols of strength. They are the ones which give stability and lead structures into posterity. Thoughts and plans are pillars too.”
